

GARDENBOX

Both GardenBox Eco and GardenBox Professional became a classical solution for gardening. Those wooden boxes made from pallet collars allow creating a raised garden bed everywhere even where there is no natural soil. You can also control the soil in the raised bed and create a vegetable patch anywhere!

The best thing about GardenBox is that this raised bed can be combined with Upyard accessories, which play a big role in achieving more convenient gardening. GardenBox proudly holds an Environment Product Declaration (EPD), ensuring transparency and accountability in our production process.

 Easy assembly

 Stackable & modular

 For garden & balcony

 Eco-friendly paint

GardenBox Eco

Same functionality with 25% less wood materials
