

GardenBox Eco & GardenBox Professional

Both GardenBox Eco and GardenBox Professional became a classical solution for gardening. Those wooden boxes made from pallet collars allow creating a garden bed everywhere even where there is no natural soil.

This raised bed provides good drainage and great protection from weeds and pests.

You can also control the soil in the bed and create a vegetable patch anywhere!

The best thing about GardenBox is that this raised bed can be combined with Upyard accessories, which play a big role in achieving more convenient gardening.
